

GREAT DIVIDE

Words & Music by Doug Carlson Copyright 2013

Two continental plate collide and give birth to the great divide
Two rivers make their own way to the sea
We tune into the network news Indoctrinate our point of view
We may not have the same philosophy

You can hear his voice on the radio through the town and countryside
The talk show host like the holy ghost, keeps milkin' the great divide

Don't judge a man on how he votes the way he looks or what he smokes
Only how he lives from day to day

You can hear his voice on the radio talkin' down to the other side
The talk show host like the holy ghost, keeps milkin' the great divide

Ain't nobody listening, ain't no compromise Feel like we are living, living on the great divide

We used to reach across the isle, compromise and reconcile
Reach across the party lines to get things done
It seems our country has lost it's way
Different shades of blue and grey
We close our hearts and minds and load our guns

You can hear his voice on the radio twisted patriotic pride
The talk show host like the holy ghost, keeps milkin' the great divide

Ain't nobody listening, ain't no compromise.
 Feel like we are living, living on the great divide

Ain't nobody listening, ain't no compromise.
 Feel like we are living, living on the great divide
